

TBI Fingerprint Background Checks on School Projects

TBI Fingerprinting requirements went into effect on school project contracts effective after Sept. 1, 2007. (Go to our website at www.tnagc.org/regulatory.htm for details of the requirements.) As such, contractors performing background checks may want a way to readily identify those that have been processed and approved to work on the site.

AGC of Tennessee has ordered hard hat stickers with the TAPS (Tennessee Applicant Processing Services) initials on them for this purpose. We know some contractors have already ordered hard hat stickers as their system of identification and we wanted to offer a lower cost sticker resulting from bulk pricing. In addition, it will help standardize to some extent the identification of processed site employees.

Hard hat sticker information: 3"x 1.5" safety yellow label with a black TAPS imprint. It is a vinyl weather-resistant laminated label with UV inks to prevent fading.

We will be selling these out of our state office for 25 cents each.

Fax your order to the state office at 615-248-6317 or order via email at marisa@tnagc.org. Stickers will be available the week of June 1st.
